### PROFILE

As a creatively driven individual, I have always been keen to experiment with design. Whilst managing Camel Ski School I re-developed the company's commercial website with the ease of the user's experience in mind - this is when I realised I have a passion for creating clean, fresh, easy-to-use websites.

I have since delved into furthering my learning and immersed myself into Le Wagon's 9-week Full Stack Web Development Coding Bootcamp, graduating as a Full Stack Developer on the 6th December 2019.

### WEB DEVELOPMENT PROJECTS

#### SWIPE-CHEF

For indecisive foodies looking for a recipe - think Tinder but for recipes!  
Built and designed remotely by a small group of Le Wagon students since graduating in December.

#### BARLY

Web application designed for bar goers, allows users to quickly and easily order drinks directly to their table, avoiding the queue.  
Final project built in the last 2 weeks of Le Wagon.

Both web applications have been built and designed using Ruby on Rails, HTML5, CSS/SASS, JavaScript, jQuery, Bootstrap, SQL, OOP and MVC Architecture. Working on group projects has been pivotal in learning how to collaborate on GitHub and the importance of communication.
